

EVALUATION CRITERIA

PLASTER WORK AND MODEL ANALYSIS (10%)

- Articulator setting
- General appearance
- Model symmetry in articulator
- Landmarks indicated on models (upper and lower)

AESTHETICS (10%)

- Tooth shape and shade (regarding patient profile)
- General natural look
- Tooth characterization and staining
- Gingival characterization and staining
- Teeth position in regard to landmarks and morphology

OCCCLUSION / FUNCTION (40%)

- 8µm Centric occlusion right
- 8µm Centric occlusion left
- Contacts on left working side
- Contacts on right working side
- Contacts on left balancing side
- Contacts on right balancing side

COMPLETION (20%)

- Upper passivity
- Lower passivity
- Attachment function (Upper)
- Acrylic adaptation to tissue (Upper)
- Acrylic contour to facilitate patient cleaning (Lower)

DOCUMENTATION (20%)

- General documentation
- Documentation quality and content
- Tooth selection (reason-to be documented)
- Quality of photos and/or videos
