

PRESS RELEASE

UNDER EMBARGO UNTIL OCTOBER 26, 2022, 9:00 AM (E.T.)

Panthera Dental is now the exclusive distributor of MK1 attachments for North America

MK1 Dental-Attachment GmbH appoints Panthera Dental as its sole distributor for North America for all their products.

Quebec (Canada), October 26, 2022. Panthera Dental (Quebec, Canada), a global leader in custom-made dental restorations, sleep breathing disorder solutions and implantology products, today announced an exclusive distribution agreement with MK1 Dental-Attachment GmbH, a German company, inventor of the MK1 attachment system. The agreement will expand Panthera Dental's exclusive components offerings within the United States and Canada.

The MK1 system is recognized as the "easy to lock and unlock" attachment that offers the stability of a fixed restoration and the convenience of a removable. Panthera Dental prosthetic division offers the widest variety of CAD/CAM dental prosthetic products and is renowned for its unprecedented product quality.

Panthera CAD/CAM Double Structure and MK1 attachments is a dream team combination for a perfect friction fit and a guarantee that the suprastructure is held securely in place.

"We, MK1 Dental-Attachment in Germany, are very happy that we have found a strong and reliable partner for North America. As our official distributor for Canada and the US, Panthera was our first choice, and our cooperation will surely be fruitful. From the start, MK1 Dental-Attachment was a family-based company, founded by Manfred Kipp who invented the product back in the '80s. We are thankful that despite all economic highs and lows our product, the MK1 Attachment, is still in the market and is being distributed worldwide." Insa Felgendreher, CEO

"Our team is very pleased that MK1 team has chosen Panthera Dental as its exclusive distribution partner," said Gabriel Robichaud, CEO of Panthera Dental. "We are looking forward to work closely with MK1 Dental-Attachment to grow our mutual business in North America."

The MK1 attachment can be easily ordered on the Panthera online ordering system in the component catalog or selected during your next Double Structure case order. Simply visit order.pantheradental.com.

About Panthera Dental

Panthera Dental designs, manufactures and markets dental prosthetic, implantology and sleep breathing disorder solutions using an innovative CAD/CAM process and superior quality materials. Both a pioneer and a leader in the field of custom-made dental solutions, its proprietary technology allows it to offer next-generation products to the widest range of patients possible. Panthera Dental is headquartered in Quebec City, Canada, with subsidiaries in the USA, France and Germany, and associates worldwide

About MK1 Dental-Attachment GmbH

MK1 Dental-Attachment GmbH produce and supply the MK1 Attachment in Non-Precious Metal (MK1 PLUS) or alternatively in Titanium Alloy (MK1 Titan). Dental labs and dentists around the world rely on MK1 Attachments for the advantage of their patients. The range of application is immense. While in the '80 and '90 of the past century, the unilateral free end prosthesis was the preferred area of application, now the combination of CAD/CAM-milled bars and MK1 Attachment has got the upper hand. Dental Implants and MK1 Attachment is a dream team. Thanks to the physiological transfer of forces, improper loading of implant posts is prevented, while at the same time the suprastructure is guaranteed to be held securely in place.
