

PRESS RELEASE

FOR IMMEDIATE RELEASE

The Panthera Fusion Bar™ recognized as the WOW Product of the year

The Journal of Dental Technology (JDT) asked industry professionals to nominate products or services that save time, money, and improve the quality of dental laboratory work. A judging panel then researched and ranked the nominations.

Quebec (Canada), October 8, 2024. Panthera Dental (Quebec, Canada), a global leader in CAD/CAM implant solutions and dental sleep appliance development, is pleased to have one of its unique products named the WOW Product of 2024. The Panthera Fusion Bar™ convinced the JDT as one of the best solutions launched this year.

Engineered shape, form and function based on dental science, the PFB™ solution offers integrated strength and durability of the titanium and implant compatibilities of Panthera's implant bar to support the superstructure. The PFB allows for in-lab milling of the overlay while Panthera manufactures the implant bar, ensuring a seamless and synchronized workflow.

Not only does it bring a WOW, it brings multiple WOWs for labs and dentists. Dental technicians love the synchronized digital workflow with no downtime, maximizing the overall production efficiency and significantly reducing turnaround time. Dentists love the durability of the PFB solution that offers a 25-year warranty for the implant bar and a 30 percent higher fracture resistance of the zirconia.

"It is an honor to be recognized by the JDT as one of the products of the year." says Gabriel Robichaud, CEO and cofounder of Panthera Dental. "This recognition reflects our constant research and development efforts to help our loyal-customers provide sustainable solutions to their patients."

Find out more about this unique solution and PFB's synchronized digital workflow at www.pantheradental.com/fusion-bar
