Medit i500 INTRA-ORAL SCANNER: NOW COMPATIBLE AT PANTHERA SLEEP

QUEBEC, CANADA – July 19th, 2019 – *Panthera Sleep is proud to announce that Medit's intra-oral scanner, the Medit i500, is now accepted for sending digital impressions. It joins the latest intra-oral technologies already accepted at Panthera Sleep.*

After receiving the first Panthera Laboratory Scanner Certification with its dental laboratory model, the Medit T500, Medit now joins the Panthera Sleep family with its intra-oral scanner: the Medit i500. It offers high precision and accuracy combined with intelligent scan recognition as well as a fast scanning speed. The Medit i500 thus joins the latest intra-oral technologies already accepted at Panthera Sleep such as the TRIOS® from 3shape, the iTero® from Align Technology and the True Definition 3M^{MC} from 3M.

“Just as our own in-house technologies and our products do, the Medit i500 offers very high precision and accuracy. It was therefore natural for Panthera Sleep to accept this intra-oral scanner for sending digital impressions.” – Béatrice Robichaud, Co-founder of Panthera Dental.

The list of intra-oral technologies accepted at Panthera Sleep is available at:
