

# PRESS RELEASE

FOR IMMEDIATE RELEASE

Panthera Dental introduces a new library integration with exocad, thus improving its digital offer.

**The exocad users can now design their own piece of art and send it to Panthera Dental to be perfectly milled in a fast turnaround time. More than 60 platforms are now compatible with exocad and 3shape, including those of well-known companies like Dentsply, Nobel Biocare, Straumann and more.**

**Quebec, February 16, 2022.** Panthera Dental is enhancing its digital workflow offer with the integration of a new library for exocad. The exocad users are now able to send their design to Panthera Dental to be milled, keeping the well-known Panthera consistent and outstanding quality in a faster turnaround time.

Dental technicians using exocad design their art with their scanner and software, in their own lab, at their own pace. Then they send the parts to be milled by Panthera in a single click and follow the manufacturing progress through Panthera's online tracking system. This new integration with exocad enhances the Panthera Dental solutions portfolio and gives dental technicians more options for their restorative workflow.

"This new integration gives complete control to exocad users on the design and ensures an unprecedented product quality with our manufacturing 4.0 precision," said Beatrice Robichaud, Co Founder and VP Marketing & Customer Experience at Panthera Dental. "It also offers a simple workflow to our customers: they design and we produce their piece of art with a perfect fit in a fast turnaround time. What more can we say?"

These new compatibilities confirm one of the main objectives of Panthera Dental: offering the most comprehensive compatibility of implant connections on the market. The exocad compatibility list and library are available for worldwide users directly on the Panthera website.

Download the new Panthera Library at [www.pantheradental.com/library](http://www.pantheradental.com/library)

The exocad and 3shape libraries are both available with DESS and ELOS scan bodies on more than 60 platforms. Discover all advantages of the Panthera STL fully digital workflow at [www.pantheradental.com/STL](http://www.pantheradental.com/STL)
