

## **PRESS RELEASE**

For immediate release

### **PANTHERA IS NOW OFFERING 20 PAIRS OF RODS PER CASE WITH THE NEW 3.0 ROD PACK**

*- D-SAD rods: the widest range of rods for the widest range of patients -*

**QUEBEC, CANADA – July 7, 2020** – Panthera Sleep is proud to announce that, as of today, all D-SAD cases will be shipped with the new 3.0 Rod Pack. The pack includes 20 pairs of rods in 0.5 mm increments, made from the same strong type 12 organic nylon than the D-SAD, for optimal device resistance to mandibular forces. The rod lengths are printed on the rods for easy reference.

“We strive to listen to our dental professional partners and patients, and that is why we designed our new 3.0 Rod Pack to allow more freedom for titration adjustments and more titration range achieved with the same splint, with no reorder needed. Furthermore, our technology allows for full customization of our devices and rods, on demand.” says Marc Morisset, Director of Strategy of Panthera Sleep.

To help D-SAD customers, the Panthera team developed a new rod replacement step by step guide demonstrating rod insertion and removal. To access the new replacement guide, click here: [www.pantherasleep.com/d-sad-rod-replacement-guide](http://www.pantherasleep.com/d-sad-rod-replacement-guide)
