

PRESS RELEASE

UNDER EMBARGO UNTIL JUNE 27, 2023, 9:00 AM (E.T.)

New Digital Workflow – Avoid physical material shipment with the *You Scan, We Design* service by Panthera Dental

Scan your physical material and send it digitally. Panthera will design and manufacture your desired product. Avoid the hassle of physical material shipment, save time and money and receive the same high-quality product with the latest digital workflow from Panthera Dental.

Quebec (Canada), June 27, 2023. Panthera Dental (Quebec, Canada), a global leader in CAD/CAM solutions for the dental and medical fields, as well as for the treatment of sleep-related breathing disorders, has launched a new digital workflow to avoid physical material shipment. Only weeks after announcing its new library 5.2.2 and a new feature in exocad to add the Panthera Angulated Screw Channel, the company is back with another digital innovation: the *You Scan, We Design* workflow.

The entire ordering process can be done seamlessly in only two easy steps: Scan your denture try in, model and scan bodies with any latest-generation laboratory scanner and create your prescription through the Panthera online ordering system. Panthera will handle the remaining steps, guaranteeing an impeccable design and unrivalled manufacturing of your desired product. As usual, you can monitor the progress of your order and validate or modify the design prior to manufacturing.

Compatible with more than 60 implant platforms, this innovative workflow is available with Panthera standard metal implant bars, but also incorporate exclusive Panthera products such as Double Structure, ReBourke™ and Diamart™, giving you a complete range of solutions for your patients.

“Say goodbye to material breakage concerns, expensive shipping or time lost in transit. Simply scan your material and Panthera will design and manufacture your desired product. Ultimately, you get to choose between physical or digital workflow, but be sure to give your patients the high-quality product they deserve through the Panthera design and manufacturing service,” says Béatrice Robichaud, Co-Founder and VP Marketing & Customer Experience at Panthera Dental.

To help customers with the new *You Scan, We Design* workflow, Panthera has updated its online ordering system and has created guides and videos.
